

## North

## Ego Likeness

Broken in like a goddamn freight train  
How did it get so dark in here?  
I wanna tell you where it hurts  
But I'm to numb to feel  
I am crushed by the weight of the glacier  
Shift my spine  
And shift my fate  
I wanna tell you where it hurts  
But I'm to numb to break

This part of me is frozen

When the wind took away our shelter  
Left us to die on the snowy hill  
I wanna tell you where it hurts  
But I'm to numb to kill  
Storm came up like a pitch-black demon  
Drown us in the Northern Sea  
I wanna tell you where it hurts  
But I'm to numb to breathe

This part of me is frozen  
(All we need is the sun)

Is it bitter where you are?  
Call it what you will  
Have you been consumed  
By this Northern chill?

Is it better where you are?  
Call it what you will  
Now that I've been consumed  
By a Northern chill

Now I've been consumed  
By a Northern chill

This part of me is frozen  
(All we need is the sun)
