

# Overdose

## Eighteen Visions

Fall down, fall down  
Take this name in vein  
Mind to fade, mind to fade  
Mind to fade, mind to fade  
Mind to fade

Burn the time on your clocks  
Their faces melt into laughing demons

Staring at the mirrors of vanity  
They claw at your face

Relentlessly ripping your eyes out  
Relentlessly ripping your eyes out

Twist your tongue  
Wasting my time again  
Melting clocks  
Start to burn

Disfigured  
You've fucked yourself down on your knees

Heaven is gone and here I stand alone  
Heaven is gone and here I stand alone  
I stand alone

Burning pain  
Feeding yourself the taste  
Urging pain  
It's time to kill

Disfigured  
You've fucked yourself down on your knees

Injection, injection  
Injection, injection  
Injection, injection  
Injection, injection  
Injection, injection  
Injection, injection

Pull the rusted blade  
You're sick again  
Time to ease the pain  
But this time it's not so easy

Fall down, fall down  
Take this name in vein  
Mind to fade, mind to fade  
Mind to fade, mind to fade  
Mind to fade

Burn the time on your clocks  
Their faces melt into laughing demons

Staring at the mirrors of vanity

They claw at your face

Injection, injection  
Injection, injection  
Injection, injection  
Injection  
Injection, injection  
Injection, injection  
Injection
