

Be Fine

Ekali

It's the wrong conversation
To have while we're wasted
It's two in the morning
So I'm not gonna say it now
It's been 600 days and
Some were good, some were wasted
But something is faded

We got a little off-beat
Somewhere there you lost me
You were always so clear to me
We got a little off-beat
Somewhere there you lost me
You were always so clear to me
Now you're not

I'm not gonna sleep for a while, eat for a while
Laugh for a while, love for a while
Then I'll be fine, then I'll be fine
You might want me in your sheets for a while, creep for a while
Won't get what you need so you'll get hostile
But then you'll be fine, then you'll be fine

This is not how we planned it
And we don't understand it
How we lost what we had, oh
And I don't know where it is
You filled up the spaces
With the light of a million stars
Got caught in your gazes, mm

We got a little off-beat
Somewhere there you lost me
You were always so clear to me
We got a little off-beat
Somewhere there you lost me
You were always so clear to me
Now you're not

I'm not gonna sleep for a while, eat for a while
Laugh for a while, love for a while
Then I'll be fine, then I'll be fine
You might want me in your sheets for a while, creep for a while
Won't get what you need so you'll get hostile
But then you'll be fine, then you'll be fine

But then you'll be fine
But then you'll be fine
But then you'll be fine
