

Be Free

Ektomorf

Today I just realized
All I believed was based on lies
Yes it hurts to know its true
I know it hurts you too
But now it's done
Yes it's done

There was a time when I would do
I would do anything for you
Give the best all I have
Follow a dream until the end
But it was lies
Full of lies

Let my heart to be free
And I'll touch the sky
And leave this all behind
And be free

My heart was captured by your shine
I was so blind I don't know why
It's too late to blame you
And I wish it was not true
But it's true
Yes it's you

I learned my lesson after all
Never trust never fall
I live my life this way
Cause I don't want more pain
No more pain
No more pain

Let my heart to be free
And I'll touch the sky
And leave this all behind
And be free
