

# Down

Ektomorf

I remember the way you used to hug me  
Called me a brother, lied to me you loved me  
And it cut like a knife, but you will realize  
Time will bring you down

Down, down, down  
It brings you down, it takes you down  
To the bottom, you scum  
Down, down, down  
It brings you down, it takes you down  
To the bottom, you fucking scum

I know your story about your fucking life  
How shit and lost you feel inside  
There is something you want but no money can buy  
So what you gonna do now?

Down, down, down  
It brings you down, it takes you down  
To the bottom, you scum  
Down, down, down  
It brings you down, it takes you down  
To the bottom, you fucking scum

Take my words, it will tear you apart  
Take my words, it will tear you apart  
Take my words, it will tear you apart  
And the truth will rip out your heart

The fear inside is the fuel that drives you  
All your motherfucking so-called love  
Your flesh and bone, through your blood  
That's the real you  
Here today but gone tomorrow  
Do you even realize the truth you're hollow?  
Rats and vultures all around you  
I can't play this game  
Being passive-aggressive is not good for me  
Not good for you  
I can't play this game  
Being passive-aggressive is not good for me  
Is not good for you

Down, down, down  
It brings you down, it takes you down  
To the bottom, you scum  
Down, down, down  
It brings you down, it takes you down  
To the bottom, you fucking scum
