

## Enemy

Ektomorf

I know your kind leave me alone  
Your smile is infected by your rotten thoughts  
Don't you feed me with your two faced lies  
I'm the shade of your fear and I kill you tonight

Enemy  
Enemy  
Enemy  
You are my enemy

Your miserable life will never be free  
You'll be dragged down by our own joulesy  
This is my life you won't take it from me  
You come around you are my worst enemy
