

# Everything

Ektomorf

Now I'm far from everything  
Now I'm far from nothing  
Now I'm far from me  
Now I'm far from you

Now I don't feel hate  
Now I only blame  
I only blame myself  
'Cause I followed you everywhere

You're a piece of shit  
You don't know the shame  
But one day motherfucker you will get back everything

You exploited my helplessness  
You exploited my weakness  
You exploited my love  
You exploited my trust

Now we are in the end  
Now we are face to face  
In your eyes so much hate  
Because you fucking afraid

You're piece of shit  
You don't know the shame  
But one day motherfucker  
You will get back everything
