Down By The Bay

Elderbrook

You might be

South side, long nights
Cast lights like satellites
Cost me like a gold mine

Oh my, Caroline
I would hang around if I had the time
'Cause I owe it to you

But I never do
And I swear to you
That I never could

So
I took my girl down by the bay
You might be the one
To take all my love and throw it away

Think of me anytime
Would you care to lean on my shoulder while
I set it off and I run a mile?

And it's the kerosene, it's the quarter line
Where the whistle blows and they call the time
Well, I should call you

But I never do
And I swear to you
That I never could

So I never do
And I swear to God
That it's only you

So
I took my girl down by the bay
You might be the one
To take all my love and throw it away

Here's to my girl down by the bay
You might be the one

Might be, so
I took my girl down by the bay
You might be the one
To take all my love and throw it away

I took my girl down by the bay
You might be the one
To take all my love and throw it away
