

Never Over

Elderbrook

I can still remember
Running from the weather
In the heart of California
I still fucking hear you
The echo on my shoulder
I still feel you closer
So it's never really over

I still see your footprint
Fade into the ocean
Honey, now it's frozen
And now you take up all my space and time
Don't want to forget what it's like
It's never over
It's never over

Not over
It's not over
It's not over
And I'm over
Not over
