

The End

Elderbrook

In the end, it all falls down
What goes around comes around
Goes around comes around
Goes around comes around
Goes around
In the end, we hit the ground
What goes around comes around
Goes around comes around
Goes around comes around
Goes around

In the end, you lose the crowd
What goes around comes around
Goes around comes around
Goes around comes around
Goes around
In the end, it makes no sound
What goes around comes around
Goes around comes around
Goes around comes around
Goes around

So, honey, make it while you can
It's only written in the sand
If you really wanna dance with me
Hold mine

What goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around
Goes around comes around

In the end, it all falls down
What goes around comes around
Goes around comes around
Goes around comes around
Goes around (Oh)
In the end, we hit the ground
What goes around comes around
Goes around comes around
Goes around comes around
Goes around

So, honey, make it while you can
It's only written in the sand

If you really wanna dance with me
Hold mine (Goes around comes around)
Goes around comes around
Goes around comes around
Goes around
