

The Love On High

Electric Guest

One day you're winning
Then it feels different
Trying to figure it out but you don't know why
Minute by minute
This world keeps spinning
And you're just beginning

You're trying to stack money and cash
But ended up on your back
The waters moving too fast
and you don't know what to do
Please show me the path
Is there another way back, I'm hoping
You're trying to feel something that lasts
But now the weather is bad
And you don't know how to ask
what you can't even view
Please show me the path
Is there another way back, I'm open

Bow down to the love on high
Only way to make it through the night
Bow down to the highest high
Only way to make it through the fire

Don't know what's missing
From the beginning
Trying to figure it out but you don't know why
Even when you're alone it's within
If the water is warm, keep swimming
You just, keep on, keep living, figure it out again

You're trying to stack money and cash
But now you're doing the math
You know it never can last
But you wanted it to
Please show me the path
Is there another way back, I'm open

Bow down to the love on high
Only way to make it through the night
Bow down to the highest high
Only way to make it through the fire

Down too long but I'm coming back
Six feet deep I remember that
Down too long but I'm coming back
Six feet deep down but I came back

Bow down to the love on high
Only way to make it through the night
Bow down to highest high
Only way to make it through the fire

Bow down to the love on high
Only way to make it through the night
Bow down to the highest light

Everything except love is a lie
