

One Day

Electric Light Orchestra

One day, when I'm tired of doing time
I get away somewhere and slowly change my mind
And one day, when you're tired of what you go through
Why don't we disappear way out into the blue

I know you you've heard it all before
But one day you know I'll come knockin' on your door
One day

One day, when my ship comes into shore
I'm gonna do the things I've never did before
Cause one day, if it's all the same to you
We're gonna disappear way out into the blue

I know you you've heard it all before
But one day you know I'll come knockin' on your door
One day

One day, there's a place I'm gonna be
Far away far away across the sea

One day
One day
One day
