

# When She's Gone

Electronic

I'm shaking like a leaf on a tree  
Do you understand? Will you come with me?  
Don't make a sound, don't even breathe  
They'll understand, why don't we leave?

We can steal a ride on a bus  
Drive down a road, all covered in dust  
Head north by north west, till we reach the coast  
We'll find an address that don't get the post

When she's gone  
Even though she won't be long  
It just tears my world apart  
Puts a hole right through my heart

She let me see her new tattoo  
It was my name, written in blue  
A mark of pain across her chest  
I was the lover on her breast

So come with me and don't be afraid  
We could be free out of the shade  
Your life has begun, come on, let's run over the ground  
In an air raid, we've got the gun, don't be afraid

When she's gone  
Even though she won't be long  
It just tears my world apart  
Puts a hole right through my heart

Only when this girl has gone  
Will I know if I am wrong  
Who would choose a life of one  
I can't carry on when she's gone

When she's gone  
Even though she won't be long  
It just tears my world apart  
Puts a hole right through my heart

Only when this girl has gone  
Will I know if I am wrong  
Who would choose a life of one  
I can't carry on when she's gone

When she's gone  
Even though she won't be long  
It just tears my world apart  
Puts a hole right through my heart

Only when this girl has gone
