

## Brasil

Elefant

I saw her standing there  
Red fire in her half  
She knows I can't resist  
The poison from her lips

I never wanted it  
I tried to run from it  
Temptation stares me down

She sings when she is sad  
She laughs when she is mad  
The lonely heart club cry  
I hear them through the night

I never wanted it  
I tried to run from it  
Temptation wears me down

Heaven can wait  
Heaven can wait for me now  
Leave open the gate  
Hell is the game I want now  
I'm coming down

She leaves me wanting more  
White flowers on the shore  
She knows I can't resist  
The poison from her lips  
The poison from her lips  
She knows I can't resist
