

## Ring around the Moon

Elephant Revival

There's a ring around the moon  
There's a ring around the moon  
There's a ring around the moon  
There's a ring around the moon

'Neath the halo of the moon  
Blew down on her sail  
Seasons changing  
I can smell it in the air  
I can see it in their paintings

And I can hear it in the wind, hear it rise and descend  
Through the many colored trees, forms a many colored breeze  
Made of many colored leaves  
Departing ever so gracefully

They fall, they fall  
They fall, they fall, they fall  
They fall, they fall  
Descending, sweet melody  
And what it is that is not ending is a sweet mystery

Like the ring around the moon  
Like the ring around the moon  
For there's a ring around the moon  
There's a ring around the moon

Flying machine rises  
Sends a light down to scan the surface  
Searches narrow  
Like the minds of the suspicious  
How I wish that we would trust us

Like the ring around the moon  
Like the ring around the moon  
For there's a ring around the moon  
There's a ring around the moon
