

All We Get

Elephante

I'm staring in your eyes
And you stare right back
I see my future in your looking glass
And I've been thinking
Of the meaning
Of all the wars and the dreams we had

We didn't always get what we wanted
The hand to hold on when we're falling
The skies above
But if this is all we get
It'll be enough
We didn't always get what we needed
But we got someone to believe in
We got our love
And if this is all we get
It'll be enough

And if this is all we get
We get
And if this is all we get
It'll be enough

And if this is all we get
We get

Lying here in your arms and you hold me close
You hold me close
The storm's outside and it's filled with love
I've been thinking
What's the reason
You're always there when I need you the most

We didn't always get what we wanted
The hand to hold on when we're falling
The skies above
But if this is all we get
It'll be enough
We didn't always get what we needed
But we got someone to believe in
We got our love
And if this is all we get
It'll be enough

And if this is all we get
We get
And if this is all we get
It'll be enough

And if this is all we get
We get
And if this is all we get
It'll be enough

Yeah your touch and your love, it's enough
I don't need anything but us
Don't care what comes

If this is all we get
Yeah your touch and your love, it's enough
I don't need anything but us
Don't care what comes
If this is all we get
It'll be enough

Yeah your touch and your love, it's enough
I don't need anything but us
Don't care what comes
If this is all we get
It'll be enough
Yeah your touch and your love, it's enough
I don't need anything but us
Don't care what comes
If this is all we get
It'll be enough
