

Dopamine

Elephante

One step forward and two steps back
We're makin' a habit of this old dance
Nobody knows where we're trying to go
Oh

One taste of the limelight now
I can't get my mind right and
I'm fallin' over trying to keep it steady

Two strikes on my life line
I'm up, pacing all night
So I need you, need you now

I need that dope
I need that dopamine
I need those bright lights flashin' every time I blink

I need that dope
I need that dopamine
I need your body up close, swayin' next to me

I need that dope
Dope
Dope

I need that dope
Dope
Dope

I need that dope

One for the memories and two for now
You're bringin' me closer to higher ground
Nobody knows where we're trying to go
Oh

One taste of the limelight now
I can't get my mind right and
I'm fallin' over trying to keep it steady

Two strikes on my life line, now
I'm up, pacing all night
So I need you, need you now

I need that dope
I need that dopamine
I need those bright lights flashin' every time I blink

I need that dope
I need that dopamine
I need your body up close, swayin' next to me

I need that dope
Dope
Dope

I need that dope

Dope
Dope

I need that dope
Dope
Dope

I need that dope
Dope
Dope

I need that dope
I need my whiskey neat
I need that Champagne poppin' every time I drink

I need that dope
I need those angel wings
Even though I know they make me say things that I don't believe

I need that dope
I need that dopamine
I need that dope
I need that dopamine
I need that dope

I need that dope
Dope
Dope

I need that dope
Dope
Dope

I need that dope
I need that dopamine
I need those bright lights flashin' every time I blink

I need that dope
I need that dopamine
I need your body up close, swayin' next to me
I need that dope
