

Right Before Our Eyes

Elephante

Baby please be kind to me
Your love is always playing hide and seek
You ask me why I can't just be honest, honest
Can't be what you want, I ain't flawless

You're moving your lips, I can't hear whatcha say
I lost your love in the light of day
Watching the past go floating by
Right before our eyes

You're movin your lips, I can't hear whatcha say
I lost my mind trying to play your games
Watching the past go floating by
Right before our eyes

You know we could've had it all
But we tried to ran before we crawled
Now you're hiding in your castle walls, castle walls

You're moving your lips, I can't hear whatcha say
I lost your love in the light of day
Watching the past go floating by
Right before our eyes

You're movin your lips, I can't hear whatcha say
I lost my mind trying to play your games
Watching the past go floating by
Right before our eyes

Right before our eyes
Right before our eyes
Right before our eyes
Right before our eyes
Right before our eyes
Right before our eyes
Right before our eyes

Watching the past go floating by
Right before our eyes
