

Inside Out

eleventyseven

Where do you go?
You're making me nervous
Lately you feel far away
Yeah I know
I can't quite call it dreaming
More like feeling fast awake
I go walking out
Into mountain darkness
Out into the night
And it soaks into my open wounds
The ones that never healed up right

When you hold me close can you feel me burn
From the inside out
From the inside out?
Will you look away or watch me turn
From the inside out
From the inside out?

When you hold me close can you feel me burn
From the inside out
From the inside out?
Will you look away or watch me turn
From the inside out
From the inside out?

Where do you go
You're making me worry
Lately you've been hard to read
Yeah I know
Cause I can't read me either
And I can't find a remedy
So off I go
Into heavy wonder
Out into the night
Cause the starlust in these borrowed bones
Is burning me alive

When you hold me close can you feel me burn
From the inside out
From the inside out?
Will you look away or watch me turn
From the inside out
From the inside out?

When you hold me close can you feel me burn
From the inside out
From the inside out?
Will you look away or watch me turn
From the inside out
From the inside out?
