

The Surface

ELHAE

Check your phone
3 in the morning I know you all alone
I know you've got your reasons
To keep your heart in stone
In what world do you love me?
So many times I've said I'm sorry you gotta move on
That's what you said to me
But do you mean it?
You said you'd never leave
Should've seen this from the start
You called me but don't wanna start over

'Cause you know I been right here
Baby yeah you know I been right here
You acting like you perfect
It's way more under the surface

Footsteps at my door
Hoping that it's you that's at my porch
In my mind we're all over each other
And when the sun comes up you're still my lover
And when it's all said and done I tried for you
Even if I had to lie for you
And even if I had to cry for you
You know I'd die for you I'd die

'Cause you know I been right here
Baby yeah you know I been right here
You acting like you perfect
It's way more under the surface
