

In Too Deep

Eli & Fur

I'm in too deep
Finding my feet frozen
Too far out of reach
For us to believe in
Let's go far away
To a foreign space, just
Take me away
Get me out of this place, yeah

I don't wanna be like all of your ones
I don't wanna be just another lover
I woke in a dream living like a million
I woke in a dream undercover...

I'm in too deep
Finding my feet frozen
Let's go far away
Just take me away, yeah

I keep on, keep on my side
Can't sleep with this on my mind
Keep keep up, lifting up high
I smoke you deep in the night
I go wherever you go
I breathe in all of your smoke
Give me one piece of your love
Of your love, of your love

I keep on, keep on my side
Can't sleep with this on my mind
Keep keep up, lifting up high
I smoke you deep in the night
I go wherever you go
I breathe in all of your smoke
Give me one piece of your love
Of your love, of your love

I don't wanna be like all of your ones
I don't wanna be just another lover
I woke in a dream living like a million
I woke in a dream undercover...
