

Close my eyes  
Swimming in the flashing lights  
All I see is golden  
Reeling for these moments  
Frozen time  
Starring in your diamond eyes  
Everything unfolding  
Hearts out in the open  
So pull me under, under  
Show me all your colours, colours  
Hold me cause without you I won't make it through the night  
Without you I don't see the otherside  
So pull me under, under  
Show me all your colours, colours  
Hold me cause without you I won't make it through the night  
Without you I don't see the otherside  
Through the night  
Through the night  
Through the night  
Through the night

Through the night  
Through the night  
Morning blue  
Looks brighter when I'm next to you  
Walking with the sunrise  
I've seen it darker sometimes  
So pull me under, under  
Show me all your colours, colours  
Hold me cause without you I won't make it through the night  
Without you I don't see the otherside  
So pull me under, under  
Show me all your colours, colours  
Hold me cause without you I won't make it through the night  
Without you I don't see the otherside  
Through the night  
Through the night  
Through the night  
Through the night  
Through the night  
Through the night
