

Parfume

Eli & Fur

It always starts with something
We've been playin' with this for so long
Now it's taken ahold of me
What you say means nothing
But it's always enough to hold on
And now it's taking control of me

Oh, we've been playin' with this for so long
Now it's taken ahold of me
Oh, it's always enough to hold on
And now it's taking control of me

Is this for real or something better

Is this for real or something better
I want you next to me

It always starts with something
We've been playin' with this for so long
Now it's taken ahold of me

Is this for real or something better
Is this for real or something better
I want you next to me
