

Start The Fire

Eli & Fur

Don't know where to start
I got nowhere to carve out
All my emotions for you

They're always
Running from my heart
I don't know where to stop
I got nothing to choose from

This is an intermission
Pushing love into my system
I don't mind if you're bringing your own

An intermission
Pushing love into the system
It's the only way to make this a home

So don't keep living your life in denial
Nobody will start the fire

Don't keep living your life in denial
Nobody will start the fire

Start the fire

I got nowhere to carve out
All my emotions for you

They're always
Running from my heart
I don't know where to stop
I got nothing to lose no

This is an intermission
Pushing love into my system
I don't mind if you're bringing your own

An intermission
Pushing love into the system
It's the only way to make this a home

So don't keep living your life in denial
Nobody will start the fire

Don't keep living your life in denial
Nobody will start the fire

Nobody will
Nobody will
Nobody will
Nobody will start the fire
Nobody will
Nobody will
Nobody will
Nobody will
Nobody will start the fire

Don't keep living your life in denial

Nobody will start the fire

Don't keep living your life in denial
Nobody will start the fire
