

## Same Pain

Eli Sostre

In the morning when I wake up  
I can't feel a thing I'm too numb  
Pills in me, it been too long  
You just hoping that I don't run  
Look me in my eyes and you could tell  
Ask me how I'm doing, I'm doing well  
I don't get too jealous, we can share  
Making sure that you ain't got a care

Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain  
Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain

Look, look, ayy, new G-Wagon just to ride right  
Looking at my eyes you say you feel life  
Real love, tell me what it feels like  
Say I hit the city for a chill vibe  
Fuck it, I guess that I'm just too young  
Got this mix up in my cup, I'm too numb  
You hit my phone like, here we go again  
'Cause I'm the only one that understands

Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain  
Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain  
Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain  
Trust nobody love, nobody the same  
Trust I know you too well, I felt the same pain
