

# virus

elijah

(Baby, you're a virus)

(Baby, you're a virus)

My head is pounding, won't go away  
I'm feeling nauseous, can't take the pain  
When did you turn dark, when did you change?  
Now I've flatlined and you're to blame

I don't know another way to explain why  
I'm breaking apart from the inside  
No pill for the pain in my mind

Baby, you're a virus (Virus)  
How you gonna leave me here so sick?  
I think might die from this (Die from this)  
How could you forget about me so quick?  
Yeah, I'm choking now, I can barely breathe  
No nothing's gonna save me  
I think I might die from this (Die from this)  
'Cause baby, you're a virus  
Baby, you're a virus (Virus)

Cold sweats, regret, controlling me  
Guess there's no cure for my disease  
Headspace locked down in quarantine  
Infected with your misery

I don't know another way to explain why  
I'm breaking apart from the inside  
No pill for the pain in my mind

Baby, you're a virus (Virus)  
How you gonna leave me here so sick?  
I think might die from this (Die from this)  
How could you forget about me so quick?  
Yeah, I'm choking now, I can barely breathe  
No, nothing's gonna save me  
I think I might die from this  
'Cause baby, you're a virus  
Baby, you're a virus

Virus  
Baby, you're a virus (Virus)  
Virus

I can't heal, it's too late  
You're already in my veins  
No pills left to take  
So go on and dig my grave  
I can't heal, it's too late  
You're already in my veins  
No pills left to take  
So go on and dig my grave  
Go on and dig my grave

Baby, you're a virus (Virus)  
How you gonna leave me here so sick?

I think might die from this (Die from this)  
How could you forget about me so quick?  
Yeah, I'm choking now, I can barely breathe  
No, nothing's gonna save me  
I think I might die from this (Die from this)  
'Cause baby, you're a virus  
Baby, you're a virus (Virus, virus)

Baby, you're a virus (Virus, virus)  
Baby, you're a virus
