

# ONPAUSE

ELIO

We were on the edge of being nothing  
And for a second there I thought about jumping  
But all the heaviness of gravity goes away when you're here touching me  
Even though we're getting close to falling

It's too soon, too much to live and let it die  
But I can't keep us alive

Ignore the pain  
Sever my mind with space and time  
When I'm away  
I kill the lights and shut the blinds  
Inside my brain  
Pretend the problem is gone  
When I put it on pause  
Just stop the time  
So we don't have to say goodbye  
Have to say goodbye  
So we don't have to

Burn until we're bound to break open  
'Cause when I get home the tables start turning  
And all this awfulness inside of me will go away and turn to tragedy  
Even though I know we both wanna solve it

It's too soon, too much to live and let it die  
But I can't keep us alive

Ignore the pain  
Sever my mind with space and time  
When I'm away  
I kill the lights and shut the blinds  
Inside my brain  
Pretend the problem is gone  
When I put it on pause  
Just stop the time  
So we don't have to say goodbye  
Have to say goodbye  
So we don't have to

And you know I'll be the one trying to make this right  
Take on most of the pain when I know it ain't mine  
I shed a tear with the way you got me in my mind  
But won't move on, won't let this stop

Ignore the pain  
Sever my mind with space and time  
When I'm away  
I kill the lights and shut the blinds  
Inside my brain  
Pretend the problem is gone  
When I put it on pause  
Just stop the time  
So we don't have to say goodbye

Shed a tear with the way you got me in my mind  
Have to say goodbye

So we don't have to (Oh)  
Have to say goodbye  
I kill the lights  
So we don't have to
