I Never Came

When you say it's dead and gone I know you're wrong Cut and slash, sharpest knife It won't die, no Poison cup, drank it up It won't die, no No fire, no gun, no rope, no stone It won't die, oh

Why you gotta shove it in my face As if you put me in my place 'Cause I don't care If you or me is wrong or right Ain't gonna spend another night, In your bed In your bed

Laws of man, are just pretend They ain't mine Love so good, love so bad It won't die Some talk too long, they know it all I just smile and move on Words ain't free, like you and me I don't mind

Why'd you have to be so mean and cruel, The dogs are loose i'm on to you You ball and... Chained together from the dawn to dusk, Can't call it leavin, cause it's just

I never came I never came I never came
