

# It Is What It Is

Elisa

Then comes the sun, comes the sun, comes the sun  
Then comes the sun, comes the sun, comes the sun

I'm packing my stuff  
Crying cause he's gone  
I'm not gonna see any of you there  
I'm gonna go far I have to be faster  
Maybe I'll get there before the pain  
Won't leave anything  
Won't take anything  
Only a story to tell one day  
It can't be too hard I keep telling myself  
While the ground's missing what's coming after

It is what it is I just need to see you n hold you n cry with you n b  
e with you [x2]

I was afraid of too many things but  
Dying to prove I was strong enough  
To make my own way to make it myself  
To pick my head up  
Be the one who helps  
But it's got my crying  
It's got me crawling  
I'm so grateful 'cause it's got me knowing  
It beats with my heart the love that we made  
Shines through my eyes  
It's out of the maze

Then comes the sun

It is what it is I just need to see you n hold you n cry with you n b  
e with you [4x]

Summer gone  
Air getting colder  
I wished that I was one of those leaves  
Carried by wind  
Naturally dying  
Never drank water  
Never touched fire  
But it got me thinking  
It got me going  
Can't be a leaf because I am woman  
I am woman

It is what it is I just need to see you n hold you n cry with you n b  
e with you [x8]

Then comes the sun...
