

I've Been In Love Before

Elkie Brooks

You changed my life
With the things that you do
And the things that you say
I'm so in love
Never known what it's like
To be feeling this way

Hard to believe when you think how I lived just yesterday
Hard to believe it was me going round, just letting my life slip away
Now you're here can't imagine how I got by
All alone in a crowd, when the crowd should be two

I feel brand new
I'm alive and reborn
And it's all 'cause of you
I've found myself
And the self that is me that I discovered in you

But can I believe that at last someone really cares for me
Hard to believe that the loves that I had before didn't mean anything
Now you're here can't imagine how I got by
All alone in a crowd, when the crowd should be two

Even the smallest thing can be such fun with you
Now that you're part of me don't ever let me go again
To the life that I led on my own

Hard to believe when you think how I lived just yesterday
Hard to believe it was me going round, just letting my life slip away
Now you're here can't imagine how I got by
All alone in a crowd, when the crowd should be two

I've been in love (I've been in love before)
I've been in love before
I've been in love
I've been in love before
I've been in love (I've been in love before)
I've been in love before
I've been in love
I've been in love before
I've been in love (I've been in love)
I've been in love before
I've been in love
I've been in love before
I've been in love
I've been in love before
