

## Too Precious

Elkie Brooks

You're much too precious to leave me But I've got to let you find fame and fortune your way You're something very special I hang on to every single word you say And darling you're too, you're too precious And darling you're too, you're too precious It's been so perfect for us I feel so secure though you had to go We joined our souls and I'll keep on dreaming I know I've got your loyalty, you've got mine Oh, you've got mine And darling you're too, you're too precious And darling you're too, you're too precious And darling you're too, you're too precious And darling you're too, you're too precious You're so attractive but you're nice with it too And I believe that you'll be faithful and true You're such a kind and considerate man Gonna hold on to you just as hard as I can And darling you're too, you're too precious And darling you're too, you're too precious And darling you're too, you're too precious And darling you're too, too, too, you're too precious
