

What About Us

Ella Henderson

I don't know where it started but I've been through too much
Did you forget your promise?
What about, what about, what about us?

Thought you were paradise
Bang, bang, then I realized
I just fell down the rabbit hole
You had a hold on me
False sense of security
Now I'm standing up on my own (Oh-oh)

I died inside
But I had to do that to survive
And it hurts that you know
I found it hard to let you go
I'm bitter, right now
But I know in time my life will get better
Oh, life will get better

I don't know when it started
But I've been through too much
Did you forget your promise?
Oh, baby, what about us?
Now I'm left broken-hearted
I gave you all my love
You talk about trust
Then what about us?

What about, what about, what about us?
What about, what about, what about us?

I tried to step away
Your love had a sour taste
Gotta protect my energy, hmm

I'm bitter, right now
But I know in time my life will get better
Oh, life will get better (Oh)

I don't know when it started
But I've been through too much
Did you forget your promise?
Oh, baby, what about us?
Now I'm left broken-hearted
I gave you all my love
You talk about trust
Then what about us?

What about, what about, what about us?
What about, what about, what about us?
What about, what about, what about us?
What about, what about, what about us?

I died inside
But I had to do that to survive
And it hurts, and you know
I found it hard to let you go

I'm bitter, right now
But I know in time my life will get better
Oh, life will get better, better

I don't know when it started
But I've been through too much
Did you forget your promise?
Oh, baby, what about us?
Now I'm left broken-hearted
I gave you all my love
You talk about trust
Then what about us?

What about, what about, what about us?
What about, what about, what about us?
What about, what about, what about us?
What about, what about, what about us?

Oh-oh-oh-oh
