

# 10,000 Hours

Ella Mai

Since the day that I was born  
I've been lookin' out for love  
But never really quite found the one  
They say practice makes perfect  
I know I deserve it  
Sometimes we should do it for fun

Baby, wind the clock up, I can't wait  
Promise this time won't go to waste  
For all we put now, I won't let your love down  
I know we're not too far away, -ay, -ayyyy

Why you always take so long to call me  
Know I gotta wake up in the morning  
You know every second adds up to a minute  
Need 10,000 hours  
We can be so in love

Don't stop, I'm counting them up  
Run the clock, I be counting them up  
We can be so in love

You know every second adds up to a minute  
Need 10,000 hours  
We can be so in love

I been right and I been wrong  
I've been high and I've been low  
But this time I know it's for sure  
Cuz I'm right where I belong  
Yeah, we're only getting stronger  
Feels good to be down in my soul

Baby, when I clock up, I can't wait  
Promise this time won't go to waste  
For all we put now, I won't let your love down  
I know we're not too far away, -ay, -ayyyy

Why you always take so long to call me  
Know I gotta wake up in the morning  
You know every second adds up to a minute  
Need 10,000 hours  
We can be so in love

Don't stop, I'm counting them up  
Run the clock, I be counting them up  
We can be so in love

You know every second adds up to a minute  
Need 10,000 hours

There's no time for us holding out  
'Cause this love is profound  
Let the clock go round, let the clock go round  
Love is best when built from the ground  
To your heart I am bound  
Let the clock go round, let the clock go round

Why you always take so long to call me  
Know I gotta wake up in the morning  
You know every second adds up to a minute  
Need 10,000 hours  
We can be so in love

Don't stop, I'm counting them up  
Run the clock, I be counting them up  
We can be so in love

You know every second adds up to a minute  
Need 10,000 hours
