

Trial By Fire

Ella Vos

Carry on
It's another brick in the wall
Putting all the weight on my shoulders
On my shoulders
Hiding out
Terrified to let it all down
Keeping every enemy closer
Keeping closer
Like hell
Living hour to hour

It's a trial by fire
Every bet gets higher
When the body knows
What the heart won't show

It's a trial by fire
Walking on a wire
When the body knows
What the heart won't show
It's a trial by fire

Waiting rooms
Sit around and wait for the news
Tryna hold my life in a memory
Chasing through me
What's to lose
If you can't hold on to the truth?
All the pieces we were forgetting
We were crumbling
Like hell, living hour to hour

It's a trial by fire
Every bet gets higher
When the body knows
What the heart won't show

It's a trial by fire
Walking on a wire
When the body knows
What the heart won't show
It's a trial by fire

Takin' the long way
Stand in the cold wind
Wait til the last breath

It's a trial by fire
Every bet gets higher
When the body knows
What the heart won't show

It's a trial by fire
Walking on a wire
When the body knows
What the heart won't show
It's a trial by fire
