

# By The End Of The Night

Ellie Goulding

Ooh-ooh  
Ooh-ooh

Wide awake, in the midnight sun  
Elevate, you're the brand-new drug  
I wanna taste, wanna dry my tears  
They disappear when I'm

With you, feel like the summer  
Saturday upper, I want you  
Don't make me wait, take me away

By the end of the night  
I wanna feel like the sky is dripping on every part of me (Part of me)  
And by the end of the night  
I wanna look at the lights  
Chasing the shape of you next to me  
And by the end of the night  
I wanna be the only one in the world  
When I look in your eyes, I see you're mine  
By the end of the night

Is it love? Call it chemical  
The way you touch, so unforgettable  
Feel the rush  
I don't wanna sleep with fever dreams when I'm

With you, feel like the summer  
Saturday upper, I want you  
Don't make me wait, take me away

By the end of the night  
I wanna feel like the sky is dripping on every part of me (Part of me)  
And by the end of the night  
I wanna look at the lights  
Chasing the shape of you next to me (Next to me)  
And by the end of the night  
I wanna be the only one in the world  
When I look in your eyes, I see you're mine  
By the end of the night

By the end of the night  
By the end of the night  
Two hearts running wild and free  
By the end of the night  
Two hearts just falling too deep (Ooh)

With you, feel like the summer  
Saturday upper, I want you  
Don't make me wait (Oh), take me away

By the end of the night  
I wanna feel like the sky is dripping on every part of me (Part of me)  
And by the end of the night  
I wanna look at the lights  
Chasing the shape of you next to me (Next to me)  
And by the end of the night

I wanna be the only one in the world  
When I look in your eyes, I see you're mine  
By the end of the night
