

# Mirror

Ellie Goulding

Is this our world?

I look in the mirror  
I can't get over you  
Is this our world?  
Is this someone else?  
Is this someone else?

I look in the mirror  
And I try to see myself  
My head full of terror  
From the games I played so well  
I try to see clearer  
I try to forget the fires I started  
I try to be nearer  
To where you are  
To where you are

Are we star-crossed lovers?  
Did I really want you gone?  
If I'm really a winner  
Where did these demons come from?

I was the girl who was on fire  
I was the girl who was on fire  
Only a bird could get much higher  
(I look in the mirror)  
'Cause I was the girl who was on fire

I look in the mirror  
And I try to understand  
And piece it together  
Wash the blood from both my hands  
I can't see the ending  
There are people who know my every secret  
I'm tired of pretending  
You're in my heart  
In my heart

Are we star-crossed lovers?  
Did I really want you gone?  
If I'm really a winner  
Where did these demons come from?

I was the girl who was on fire  
I was the girl who was on fire  
Only a bird could get much higher  
(I look in the mirror)  
'Cause I was the girl who was on fire
