

# You Changed Everything

Ellie Goulding

Intense on your pearly skin  
You left me in the dark this time  
You let your heart decide  
I needed you, needed you to hold me  
I needed you're how to love the only  
Am I lost?  
Will you leave me lonely?  
Am I lost?

Cause you changed everything  
You changed everything  
When I close my eyes  
I see the one I lost and keep on losing  
You take everything from me  
Everything  
I know I try to hide  
I know it's true  
Everything is you

I took every charge I could  
And found you in your loveless arms  
So full of false alarms  
I needed you, needed you to hold me  
I needed you're how to love the only  
Am I lost?  
Will you leave me lonely?  
Am I lost?

Cause you changed everything  
You changed everything  
When I close my eyes  
I see the one I lost and keep on losing  
You take everything from me  
Everything  
I know I try to hide  
I know it's true  
Everything is

And all I knew is gone  
And all I know is new  
And all the darkness so lone  
Hold on

Cause you changed everything  
You changed everything  
When I close my eyes  
I see the one I lost and keep on losing  
You take everything from me  
Everything  
I know I try to hide  
I know it's true  
Everything is you
