

If I'm closer to the sun  
I'm the furthest from someone  
I'm the chord that wont resolve  
Is this what I've become  
And I just cannot leave  
I keep on burning from the heat,  
I'm blinded from the spill  
Of light as she shines on me

And oh she's bringing in, she's bringing in the light  
And I'm, I'm getting it, I get it I'm alive  
Don't count on your satellites  
To say she's here tonight  
Just know she's bringing in  
She's bringing in the light

And oh she likes to lead,  
Every way she led me on  
She took the ground beneath my feet  
And drew me closer to the sun  
My mind is spinning I've reached the edge  
I'm veering out of control  
She gracefully reels me in, and oh  
Here she comes, here she goes

And oh she's bringing in, she's bringing in the light  
And I'm, I'm getting it, I get it I'm alive  
Don't count on your satellites  
To say she's here tonight  
Just know she's bringing in  
She's bringing in the light

And oh she's bringing in, she's bringing in the light  
And I'm, I'm getting it, I'm getting I'm alive  
And don't count on your satellites  
To say she's here tonight  
Know she's bringing in  
She's bringing in the light

And oh she's bringing in, she's bringing in the light  
And I'm, I'm getting out, I'm getting out alive  
Don't count on your satellites  
To say she's here tonight  
Just know she's bringing in  
She's bringing in the light

Know she's bringing in  
She's bringing in the light
