

Appetite

Ellise

Baby, I've been starvin'
Someone ate up my heart and
He left a big hole and it turned me cold
Now he's buried in my garden
Say it 'bout to please me
I can snap so easy
Ever since I met you, you've been on the menu
I'm ready for the feasting

Lick my lips, you're so delicious
Put you on my plate

I, I like those teal blue eyes
They let go and they might try and fight
My big, big appetite
I don't need a fork or knife
Just need to take a bite, can't deny
My big, big appetite

I love it when they question, will I go for seconds?
I'll take a big steak with a side of offensive
Clearin' off the plate now, but more the room for takeout
Finish every drop, every crime and he wait now
Come wine with me, come dine with me
Come spy with me, can't hide from me
Kill time with me like murder in the first degree

I, I like those teal blue eyes
They let go and they might try and fight
My big, big appetite
I don't need a fork or knife
Just need to take a bite, can't deny
My big, big appetite

I
My big, big appetite
I

Lick my lips, you're so delicious
Put you on my plate

I, I like those teal blue eyes
They let go and they might try and fight
My big, big appetite
I don't need a fork or knife
Just need to take a bite, can't deny
My big, big appetite
