

Zipperlips!

Ellise

Lie to my friends
Tell them your washed from my hands
While I'm with you, making amends
You hook me and sink me again (Ahh)
Gimme a sec
Move forward and take a step back
I say that you're left in the past
While I pack an overnight bag (Ahh)

All in my head about what's going on right now, you and me
Close the curtains please, so that nobody sees
How fucking dumb, I've been letting you in again
I can't be, the one you keep
It's just a little secret

I won't talk about it again
Let me kiss you on your zipperlips
Don't want conversation or friends
Let me kiss you on your zipperlips

Drive to your place
Wipe off that look on your face
Don't act like your winning a game
While I stand here, feeling ashamed
Guess I got sad (sad)
And wanted the touch of your hands (Touch of your hands)
I swear that I saved you for last
And now that I've done something bad (Ahh-ahh)

All in my head about what's going on right now, you and me
Close the curtains please, so that nobody sees
How fucking dumb, I've been letting you in again
I can't be, the one you keep
It's just a little secret

I won't talk about it again
Let me kiss you on your zipperlips
Don't want conversation or friends
Let me kiss you on your zipperlips
I won't talk about it again (I won't talk about it again, yeah)
Let me kiss you on your zipperlips (Let me kiss you on your zipperlips)
Don't want conversation or friends (Don't want conversation or friends)
Let me kiss you on your zipperlips
