

Saviour

Elmiene

Oh, yeah, yeah

If you could be just any something, you could be my saviour
Promise for my innocence that you would fight for ages
And time is nothin', through war and lovin'
Just find a reason, and peace is certain
Take a breath and realize you left me in this danger
Thinkin', "Whoa, he mean too much, [?]"
And time is nothin', through war and lovin'
Just find a reason, peace is certain, yeah

If only you'd take me there
You'd probably believe me then
Why can't we just be that? Oh
Why can't we just relax?

Please, just blow it all away
Please, just blow it all away, oh
Please, just blow it all away, away, away
Please, just blow it all away

If you could be just any something, you could be my saviour
Why be afraid of mistakes you've been makin'?
Why make assumptions that turn a somethin'
Into a nothin'? Just be a person
Remember what I think of you is baseline of a [?]
And what you leave me leads me to you, baby
Don't make assumptions that turn a somethin'
Into a nothin', just be a person, yeah

If only you'd take me there
You'd probably believe me then
Why can't we just be that? Oh
Why can't we just relax?

Please, just blow it all away
Please, just blow it all away, oh
Please, please, please, please, just blow it all
Please, just blow it all, it all, it all, oh, away

Please just blow it, please just blow it
Please, oh, oh, oh
Oh, oh, oh
Oh, oh, oh, oh
Be my saviour, be my saviour
Please, just, please, just, please, just, please, please
Just please, just please
Oh, just please, oh, just please
Oh, just, just please don't let me down
