

Bring Me Back

Elohim

Baby, when I'm sleeping all alone
I just gotta feel you by my side
The clouds are spinning, they keep getting thicker
I just wanna love you through the night

Feel my body aching through your fingers
Give me every inch of your desire
I just wanna live inside your love
I just wanna love you through the night

I need you to bring me back
I need you to bring me back
I need you to bring me back
I need you to bring me back
I need you to bring me back...
I need you to bring me back to life

This love got me out of my mind
I need you to bring me back
This love got me out of my mind
I need you to bring me back

I don't wanna stay like this forever
Show me all the truth around your eyes
This in general is not a silence
I need you to bring me back to life
Come and lay me down from the front
Let's forget the pain inside the dance
I don't wanna lose another hour
I just wanna love you through the storm

I need you to bring me back
I need you to bring me back
I need you to bring me back
I need you to bring me back
I need you to bring me back...

This love got me out of my mind
I need you to bring me back
This love got me out of my mind
I need you to bring me back

This love got me out of my mind
I need you to bring me back
This love got me out of my mind
I need you to bring me back

Baby, when I'm sleeping all alone
