

Connect

Elohim

What is your name?
Where do you come from?
I know I could save you
I know you could save me too
I got a plan
Let's meet in the middle
In outer space

I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with...

I like your eyes
What do you taste like?
Are you surprised
That I would ask you that?
We're all on the ride
Sometimes it goes too fast
Let's slow it down tonight

I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with...

We're here to connect you know?
Simple as that, let's go
Molecules spinning
The love that I'm sending
It's just the beginning
We're here to connect, you know?
1, 2, 3, let's go
Lives intersecting
No walls protecting
I'm just here to connect with you

I'm just here to connect with you (oh)
I'm just here to connect with-
Here to connect
Here - here to connect with
Here to connect
Here - here to connect with
Here to connect with
Here - here to connect with
Here to conn-

I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
I'm just here to connect with you
