

Eclipse

Elohim

It's like magic, a kick to the head
Moonlight shining under my bed
It's like acid thinning my blood
Comets crashing on the tip of my tongue

Maybe we'll die
Underneath the starry sky, oooh
I'm not gonna lie
I got a funny feeling tonight

That you could be my best time
(You, you, you)
You could be my best time
(You, you, you)
You could be my best time

Till the sun burns out the moon
Till someone else eclipses you
You could be my best time

It'd be tragic if we never met
We both have amnesia but we couldn't forget

Maybe we'll die
Underneath the starry sky, oooh
I'm not gonna lie
I got a funny feeling tonight

That you could be my best time
(You, you, you)
You could be my best time
(You, you, you)
You could be my best time

Till the sun burns out the moon
Till someone else eclipses you
You could be my best time

You could be my best time
(You, you, you)
You could be my best time
(You, you, you)
You could be my best time
You could be my best time
(You, you, you)
You could be my best time
(You, you, you)
You could be my best time

Till the sun burns out the moon
Till someone else eclipses you
