

Go Through It

Elohim

Wait
My soul is feeling kinda naked
I'm exposed
Scars and all so
Try to keep my hands from shaking
Let my tears fall
Like a waterfall

Let it rain down, let it rain down
Cuz I know

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it through it, ya

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it, ya

Through it through it through it
Through it through it through it through it ya
Through it through it through it
Through it through it through it through it ya

You don't understand my process
Sorry I can't be
What you want from me
If I'm really being honest
Let my tears fall
Like a waterfall

Let it rain down, let it rain down
Cuz I know

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it through it, ya

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it, ya

Through it through it through it
Through it through it through it through it ya
Through it through it through it

Through it through it through it through it ya

You need to give me time
Would you be so kind
Let me lose my mind

Let me go through it
To get through it, ya

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it through it, ya

Wait
I don't care what you think
Fuck what you people think
I gotta go through it
So let me go through it
To get through it, ya

Through it through it through it
Through it through it through it through it ya
Through it through it through it
Through it through it through it through it ya

Through it through it through it
Through it through it through it through it ya
Through it through it through it
Through it through it through it through it ya

Wait...

Let me go through it
To get through it, ya
