Nice And Slow

Elton John

We can spend the night right So honey turn out the lights and do it nice and slow Do it nice and slow

You can work on a charm
And tell the man in your arms
To do it nice and slow
Do it nice and slow

Lying here in a way that I have always wanted Close to you in a scene that I have always haunted Time and time again we defended a right to cling to Our love-shy goodbyes, for broken hearts could cry

You can do it, you can do it slow You can do it slow, slow, slow You can do it slow, slow Do it nice and slow

You can turn on the heat
To keep a man on the streets
When you do it nice and slow
I like it when you do it nice and slow

You can work on a spell
And weave your magic so well
When you do it nice and slow
come on and do it nice and slow

You can do it, you can do it I know You can do it nice and slow You can do it, you can do it You can do it nice and slow, slow I like it when you do it slow, slow

Come on and do it Do it nice and slow
