

## Rocket Science

Elvie Shane

I bet you're out there seeing stars  
In someone else's eyes by now  
While I'm just out here in the dark  
Sparkling up and burning out  
This Backwoods you had rolled for us  
But it don't pack the same old punch  
Your memory's gravity  
And it just keeps me down

Yeah, if I found a way to make it past the moon  
I bet this heart would aim itself right back at you  
Ain't no way underneath this sky  
I'm getting over you, I can't get that high  
But I'm leaving smoke trails trying  
Forgetting you's like rocket science

No, there ain't no fuse that sets me loose  
And sends me soaring somewhere else  
Tried getting gone but it ain't no use  
I can't get past the way it felt  
When you took off at the speed of sound  
'Cause that goodbye still hangs around  
Said space and time were what you needed  
But, damn, I need you now

Yeah, if I found a way to make it past the moon  
I bet this heart would aim itself right back at you  
Ain't no way underneath this sky  
I'm getting over you, I can't get that high  
But I'm leaving smoke trails trying  
Forgetting you's like rocket science  
Like rocket science

I got a feeling this feeling ain't got a fix  
Yeah, and taking these hits remind me what I miss

If I found a way to make it past the moon  
I bet this heart would aim itself right back at you  
Ain't no way underneath this sky  
I'm getting over you, I can't get that high  
But I'm leaving smoke trails trying  
I'm leaving smoke trails trying  
Forgetting you's like rocket science
