

Piper

Elvis Depressedly

Piper held me in the truck bed
I thought I was as good as dead
We made love back when love was enough
Snuck into a fancy hotel
An empty ballroom where the stars fell
We made love back when love was enough
Another town another night club
Another party full of fuck ups
Making love back when love was enough

Lover leave become my friend
Become someone I'll never see again
Making love with the memory of love

Cigarette burned conversations
Wait for sunrise feeling anxious
Making love back when love was enough
I got angry for no reason
Shouting down my better feelings
Making love back when love was enough
Now I call and you don't answer
I got drunk and blew my chances
Making love back when love was enough

Lover leave become my friend
Become someone I'll never see again
Making love with the memory of love

I was a sad kid I was hurting I turned 30 in a hurry
I was a sad kid I was hurting I turned 30 in a hurry
I was a sad kid I was hurting I turned 30 in a hurry
I was a sad kid I was hurting I turned 30 in a hurry
I was a sad kid I was hurting I turned 30 in a hurry
I was a sad kid I was hurting I turned 30 in a hurry

I turn around the leaves are falling
I can feel my engine stalling
I can feel my engine
Stalling
