We'll Be Together

Elvis Presley

Oh I will never forget the first night we met Was love I was searching for My heart beat faster and faster, oh so much faster Faster than it did before

Juntos estaremos Siempre por siempre Junto a mi corazo'n Siempre estara's

We'll be together, and love forever Nothing can change our destiny

I knew the moment I kissed you, couldn't resist you Together we belong And then I knew in that moment just what this glow meant True love had come along

We'll be together, ever and ever, close to my heart You'll always be. We'll be together, and love forever Nothing can change our destiny
