Nothing We Can't Handle

Emeli Sandé

They're doing you wrong doing you dirty
If they hurt you they gonna hurt me
They're getting their kicks bursting your bubble
But see when I'm back there gon be trouble
Whenever it feels that the rain won't stop
If ever it feels that the sky might drop
You gotta know you gotta call me
'Cause you gotta know

That when shit gets too deep
When you start losing sleep
When you start thinking
No I just can't stand it
Remember you got me
Remember we got we
And don't forget
There's nothing we can't handle

I've known you too long
Don't you pretend now
You got a friend you got a friend now
Whenever you fall I'm gon pick you up
I'm holding on I won't let you drop
Now you better call me
Don't you go quiet
You're not alone we gon fight it
Whenever you need me, just call, just call

'Cause when shit gets too deep
When you start losing sleep
When you start thinking
No I just can't stand it
Remember you got me
Remember we got we
And don't forget
There's nothing we can't handle

You've been low
You've been hurt before
On the floor
There's been tears I know
Call me friend
Call me anytime
I am here
I am by your side

Yes when shit gets too deep
When you start losing sleep
When you start thinking
No I just can't stand it

Remember you got me
Remember we got we
And don't forget
There's nothing we can't handle

When you start feeling weak

When you start losing sleep
When you start thinking
No I just can't stand it
Remember you got me
Remember we got we
And don't forget
There's nothing we can't handle

There's nothing we can't handle No way
There's nothing we can't handle
There's nothing we can't handle
Hey there's nothing we can't handle
